Who are we?

Venster School of Excellence, a premier Low-Cost Ed-Tech and Professional Skill Development Centre based in Coimbatore, specializes in delivering high-quality career-focused courses that prioritize practical skills needed in real-world jobs. Founded with a mission to bridge the gap between education and employment, Venster is committed to providing industry-aligned training that empowers students, graduates, working professionals, and career-switchers to become truly job-ready.

Why Choose us?

Industry-Grounded Mentors

Learn from certified trainers and active industry professionals who bring real project experience, practical tools, and hiring insights directly into every session.

Flexible, Modern Formats

Balance college, work, and upskilling with weekday, weekend, and fast-track batches offered in offline, online, and hybrid learning modes across South India.

High Value, Low Cost

Access quality, industry-aligned training, certifications, and career support at affordable fees so you can upgrade your income potential without heavy debt.

Career-Focused Ecosystem

Benefit from structured career roadmaps, college partnerships, placement linkage, and continuous mentoring that turn you into an employable, confident professional.

Learn by Doing

Master skills through hands-on labs, live tools, and real-world projects so you graduate with work-ready competence, not just classroom-level knowledge.

Business Analyst

Bridge the gap between business needs & technological solutions. This course is designed to transform you into a strategic thinker who can analyze complex business processes, document requirements, and drive organizational change.

You will learn to use data and logic to help companies improve their products, services, and software through data-backed insights.

Curriculum

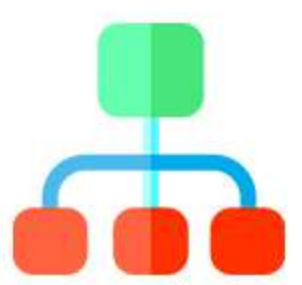

Introduction to Business Analysis & SDLC

Understanding the BA role and responsibilities. Exploration of the Software Development Life Cycle (SDLC) with a focus on Waterfall, Agile, and Scrum methodologies.

Requirement Engineering & Documentation

Mastering the art of gathering requirements. Learning to draft professional documentation including Business Requirement Documents (BRD), Functional Documents (FRD), & User Stories.

Business Modeling & Diagramming

Visualizing processes using industry-standard tools. Creating Unified Modeling Language (UML) diagrams, including Use Case diagrams, Activity diagrams, & Flowcharts to map business workflows.

BA Tools & Data Analysis

Hands-on training with essential tools like JIRA for project tracking and Confluence for collaboration. Introduction to SQL for data retrieval and basic Excel for business reporting.

User Acceptance Testing (UAT) & Change Management

Learning the final stages of the project lifecycle. Coordinating UAT sessions, managing stakeholder expectations, and ensuring the final product meets the original business goals.
