Who are we?

Venster School of Excellence, a premier Low-Cost Ed-Tech and Professional Skill Development Centre based in Coimbatore, specializes in delivering high-quality career-focused courses that prioritize practical skills needed in real-world jobs. Founded with a mission to bridge the gap between education and employment, Venster is committed to providing industry-aligned training that empowers students, graduates, working professionals, and career-switchers to become truly job-ready.

Why Choose us?

Industry-Grounded Mentors

Learn from certified trainers and active industry professionals who bring real project experience, practical tools, and hiring insights directly into every session.

Flexible, Modern Formats

Balance college, work, and upskilling with weekday, weekend, and fast-track batches offered in offline, online, and hybrid learning modes across South India.

High Value, Low Cost

Access quality, industry-aligned training, certifications, and career support at affordable fees so you can upgrade your income potential without heavy debt.

Career-Focused Ecosystem

Benefit from structured career roadmaps, college partnerships, placement linkage, and continuous mentoring that turn you into an employable, confident professional.

Learn by Doing

Master skills through hands-on labs, live tools, and real-world projects so you graduate with work-ready competence, not just classroom-level knowledge.

UI/UX Design

Equip yourself with the art of creating user-centric digital experiences. This course takes you through the entire design process—from understanding user psychology to building high-fidelity interactive prototypes.

You'll learn to design visually stunning interfaces for mobile and web while ensuring a seamless, intuitive experience for every user.

Curriculum

Introduction to UI/UX & Figma Basics

Understanding the difference between UI and UX. Setting up Figma, mastering layout grids, typography, and color theory to create professional-grade visual styles.

User Research & Wireframing

Learning user persona creation and empathy mapping. Building low-fidelity and mid-fidelity wireframes to map out app architecture and user flows.

Prototyping & Interactions

Transforming static designs into clickable prototypes. Mastering "Smart Animate," micro-interactions, and transitions to simulate real app behavior.

Responsive Design & Components

Building flexible layouts for mobile, tablet, and desktop. Using Auto-Layout, Components, and Variants to create scalable design systems.

Real-World Design Project

Applying all learned principles to a complete project—from initial research to a final, presentation-ready portfolio piece on Behance
